Approved Type 1 Use Regulation

Name of the type of Living Modified Organism:	A Rose Variety With Modified Flavonoid Biosynthetic Pathway WKS82/130-9-1 (<i>F3' 5' H, 5AT, Rosa hybrida</i>)(OECD UI:IFD-52901-9)
Content of the Type 1 Use of Living Modified Organism:	Cultivation in isolated field, storage, transportation, disposal, and acts incidental to them
Method of the Type 1 Use of Living Modified Organism:	Location: 387-2 Chiyoshiiba, Fukudashimoaza, Tsuyama, Okayama, Japan Name: Isolated field at Misaki, NISSHOKU Corporation Period of evaluation: From May 2, 2006 to December 31, 2010 1. Facilities of the isolated field (1) Security fence around the circumference of the isolated field to prevent unauthorized entry. (2) Prominent notice board that is easy to find, indicating the area is an isolated field and is forbiddance of unauthorized entry, also indicating the name of the administrator. (3) Washing area to wash out living modified organisms from machinery, equipment, and footwear used in the area. Install sedimentation tank and nets in a drainage system to prevent unexpected flowing out of extraneous recombinant rose. (4) Miscellaneous tree are surrounding the isolated field, functioning as a shelter against wind to reduce the dispersal of pollen .

	<p>2. Operation procedures in the isolated field</p> <ul style="list-style-type: none">(1) Suppress the growth of plants other than recombinant rose and the control rose to the lowest level.(2) Prevent unexpected spillage of recombinant rose in transit and storage by using secure container.(3) Inactivate recombinant rose after cultivation by plowing back in the isolated field or other methods, except transit and storage of the recombinant rose outside the isolated field in compliance with paragraph (2).(4) Prevent unexpected outspread of extraneous recombinant rose by washing machinery, equipment, and footwear used the isolated field.(5) Maintain and manage the facility so that it can adequately function.(6) Ensure personnel compliance with paragraphs (1) through (5) when implementing Type I Use.(7) Implement the monitoring based on the plan of monitoring which has been decided in addition.(8)When risk of an adverse effect on biological diversity is detected, ensure implementation of stipulated “emergency measures plan”.
