

Corporation obtaining approval, the name of its representative, and the address of its main office

National Institute of Agrobiological Sciences
Masaki Iwabuchi, President

2-1-2 Kannondai, Tsukuba, Ibaraki

Approved Type 1 Use Regulation

Name of the type of Living Modified Organism:	Erect-leaved semidwarf rice (<i>AOsBR11</i> , <i>Oryza sativa</i> L.) (B-4-1-18)
Content of the Type 1 Use of Living Modified Organism:	Cultivation in isolated field, storage, transportation, disposal, and acts incidental to them.
Method of the Type 1 Use of Living Modified Organism:	Location: 2-1-2 Kannondai, Tsukuba, Ibaraki Name: Isolated field, National Institute for Agro-Environmental Sciences Period of evaluation: From June 2004 to March 2005 1. Facilities of the isolated field (1) Security fence to prevent entry of unauthorized persons (2) Prominent notice board indicating that the area is off limit for unauthorized persons and including the name of the responsible person. (3) Wash area to wash out soil from machinery, equipment, and footwear used in the area. (4) Forest windbreak that reduces dispersion of pollen.

	<p>2. Operation procedures in the isolated field</p> <ol style="list-style-type: none">(1) Suppress to the lowest extent possible the growth of plants other than recombinant rice or the control rice.(2) Prevent spillage of recombinant rice seeds when recombinant rice is transported or stored outside the isolated field.(3) In cases other than (2), inactivate recombinant rice in the isolated field after completion of cultivation.(4) Prevent the transport of recombinant rice that is attached to machinery or equipment used.(5) Maintain the facility so that it can adequately function.(6) Ensure personnel compliance with paragraphs (1) through (5) when implementing Type I Use.(7) When risk of an adverse effect on biological diversity is detected, ensure implementation of measures stipulated in the attached “emergency measures plan”.
