 3-1-1 Kannondai, Tsukuba,
 Ibaraki

Approved Type 1 Use Regulation

Name of the type of Living Modified Organism:	High tryptophan rice (<i>OASAID, Oryza sativa</i> L.) (KPD722-4)
Content of the Type 1 Use of Living Modified Organism:	Cultivation in isolated field, storage, transportation, disposal, and acts incidental to them
Method of the Type 1 Use of Living Modified Organism:	<p>Location: 3-1-1, Kannondai, Tsukuba-city, Ibaraki-ken</p> <p>Name: Isolated field, National Institute of Crop Science</p> <p>Period of Use: From July 30, 2009 to March 31, 2011</p> <p>1. Facilities of the isolated field</p> <p>(1) Security fence around the circumference of the isolated field to prevent unauthorized entry.</p> <p>(2) Prominent notice board that is easy to find, indicating the area is an isolated field and is forbiddance of unauthorized entry, also indicating the name of the administrator.</p> <p>(3) Washing area to wash out soil and recombinant rice, etc from machinery, equipment, and footwear used in the area. Install sedimentation tank and nets in a drainage system to prevent unexpected flowing out of recombinant rice.</p> <p>(4) Net to protect recombinant rice from entry of wild animals such as birds will be installed around the circumference of the cultivation area before</p>

heading time.

2. Operation procedures in the isolated field

- (1) Suppress the growth of plants other than recombinant rice and the control rice to the lowest level.
- (2) Using secure container which prevent unexpected spillage of recombinant rice, when recombinant rice goes out from isolated field as transit and storage.
- (3) Inactivate recombinant rice after cultivation by plowing back in the isolated field or other methods, except transit and storage of the recombinant rice outside the isolated field in compliance with paragraph (2).
- (4) Prevent unexpected outspread of extraneous recombinant rice by washing machinery, equipment, and footwear used in the isolated field.
- (5) Maintain and manage the facility so that it can adequately function.
- (6) Ensure personnel compliance with paragraphs (1) through (5) when implementing Type 1 Use.
- (7) When risk of an adverse effect on biological diversity is detected, ensure implementation of stipulated “emergency measures plan”.
