Approved Type 1 Use Regulation

Name of the type of Living Modified Organism:	Cotton tolerant to glufosinate herbicide and resistant to Lepidoptera (Modified <i>bar</i> , Modified <i>cry1Ab</i> , <i>Gossypium hirsutum</i> L.) (T304-40, OECD UI:BCS-GH004-7)
Content of the Type 1 Use of Living Modified Organism:	Cultivation in isolated field, storage, transportation, disposal, and acts incidental to them
Method of the Type 1 Use of Living Modified Organism:	<p>Location: 1-1, Gakuen Kibanadai-nishi, Miyazaki-shi, Miyazaki-ken</p> <p>Name: Isolated field, University of Miyazaki (tentative name)</p> <p>Period of Use: From January 25, 2010 to May 31, 2012</p> <p>1. Facilities of the isolated field</p> <p>(1) Security fence is surrounding the circumference of the isolated field to prevent the entry of any unauthorized persons.</p> <p>(2) Prominent notice board showing that the facility is an isolated field, unauthorized persons are prohibited to enter the facility, and the name of management representative.</p> <p>(3) Washing area to remove soil and any genetically modified cotton, etc away from the machinery or equipment used in the isolated field, or the shoes of the persons engaged in the work in the isolated field. Install facilities in a drainage system to prevent unexpected overflow and spread of genetically modified cotton to the outside of the isolated field.</p> <p>(4) Shelterbelt against wind is surrounding the isolated field.</p> <p>2. Operation procedures in the isolated field</p> <p>(1) Minimize possible growth of any plants in the isolated field other than the genetically modified crops and the control cotton.</p>

	<p>(2) Use secure containers to prevent unexpected spillage of the genetically modified cotton in cases when the genetically modified cotton is transferred to outside of the isolated field or stored outside of the isolated field.</p> <p>(3) Inactivate the genetically modified cotton and the control cotton in the isolated field after cultivation by plowing back into the isolated field or by using other methods, excluding the cases of transit and storage described in paragraph (2).</p> <p>(4) Prevent unexpected spread of extraneous genetically modified cotton by washing machinery, equipment, and footwear used in the isolated field.</p> <p>(5) Maintain and manage the facility so that it can adequately function.</p> <p>(6) Ensure personnel comply with paragraphs (1) through (5) when implementing Type 1 Use.</p> <p>(7) When risk of an Adverse Effect on Biological Diversity could arise, promptly take the measures in accordance with “emergency measures plan” which has been stipulated separately.</p>
